Terrain Drainage

Welcome to Polypipe

At Polypipe, conceiving, designing, manufacturing and delivering the most advanced products and systems isn't merely an occupation. It's a passion. One that's based around a few simple beliefs. Expertise isn't an option. Quality always beats quantity. Products are nothing without service and support. Sustainability isn't just a 'green' word. And working with our customers is much better than simply supplying them.

Polypipe has an enviable reputation amongst installers, contractors, stockists and specifiers – and it's not hard to see why. We have over 20,000 product lines, a substantial fleet of over 400 vehicles and well over 3,000 employees.

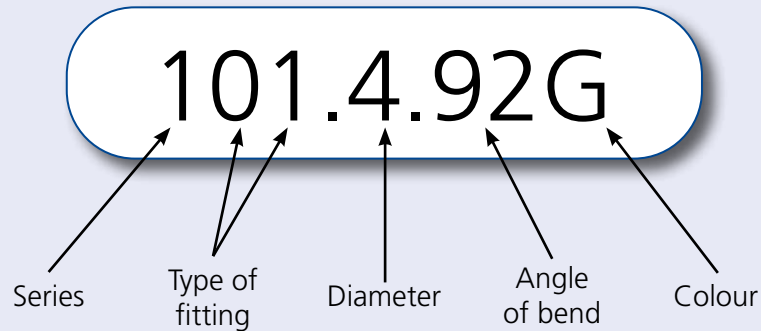

Our unrivalled portfolio offers dependable, innovative solutions for pressure and non-pressure applications, enabling the movement of water, air, power, chemicals and telecoms throughout the built environment. We operate through sector-focused businesses, ensuring that our Sales and Technical Teams are equipped to meet the specific needs of the residential, civils & infrastructure, commercial and industrial projects.

We are best known for our plastic pipe solutions, but we do so much more. For example, our fabrication service, Polypipe Advantage, is capable of producing bespoke systems that are created to match the site-specific requirements of your project.

Be it a versatile system to manage water, air and energy, or an innovative 'whole building' solution compliant with the latest legislation, our considerable expertise and project knowledge can provide you with almost limitless options. Moreover, our ability to manufacture both on-site and off-site solutions means we can offer savings in terms of project times, Health and Safety considerations and overall costs.

A Guide to the Terrain PVC Drainage Numbering System

Above Ground Drainage

Series

- 100 = PVCu Solvent Weld Soil
- 100P = PVCu Push Fit Soil
- 200 = MuPVC Solvent Weld Waste
- 300 = PP Push Fit Waste
- 400 = Traps
- 500 = PVCu Overflow
- 600 = ABS Waste
- 900 = FUZE

Diameter

- 1.25 = 1¼" or 32mm N/D waste
- 1.5 = 1½" or 40mm N/D waste
- 2 = 2" or 50mm N/D waste
- 3 = 3" or 82mm O/D soil
- 4 = 4" or 110mm O/D soil
- 6 = 6" or 160mm O/D soil
- 8 = 8" or 200mm O/D soil
- 10 = 10" or 250mm O/D soil

Type of Fitting

- 100 = Pipe
 - 101 = Bend (Double Socket)
 - 104 = Branch
 - 106 = Corner Branches
 - 107 = Bend (Spigot Socket)
 - 110/111 = Couplings
 - 13x = Access Fittings
- (these numbers are the same for all series)

Colour

- G = Grey
- B = Black
- W = White
- R = Rustic (Brown)
- T = Terracotta

Products marked in the product listings are:

 - Available in .DWG file format.

 - Available in .RFA and .ADSK file format.

These files are ready to incorporate into design drawings.

If you would like the files in the relevant format, simply contact the Advantage Team on 01622 795200 or email commercialeenquiries@polypipe.com.

Terrain Soil & Waste

Introduction

Having pioneered the development of solvent-welded systems, Terrain soil and waste products represent the industry benchmark for quality, installation flexibility and product innovation backed by the highest levels of customer service.

Terrain drainage systems include an extensive range of soil and waste drainage products for high rise residential, hotels, hospitals, schools and public sector developments, all built on the strength of the Terrain brand.

Systems include solvent-welded and push-fit options for both soil and waste drainage; overflow and trap systems; and a comprehensive range of adaptors and accessories. Products are available in a range of colours.

- Industry leading range of solvent and push-fit soil and waste solutions.
- Unique products offer unrivalled installation options.
- Adaptable to our Terrain FUZE system.
- Includes a number of unique UK fittings making it versatile for a number of applications.

100-Solvent Terrain Soil System

82, 110 and 160mm PVCu soil pipes and fittings

- Wide range of bends, branches and access fittings to meet all application requirements
- Great problem solving products in the range

100P-PushFit Terrain Soil System

82, 110, 160, 200 and 250mm PVCu soil pipes and fittings for push-fit jointing

- Saves time and labour costs
- Also for use with Terrain roof outlets for rainwater drainage

200-Solvent Terrain Waste System

Solvent-welded MuPVC system

- 32, 40 and 50mm integrated systems
- Wide range of bends and adaptors
- Integrated floor gullies

300-PushFit Terrain Waste System

Push-fit polypropylene system

- 32 and 40mm integrated systems
- Quick and easy to install
- Saves time and labour costs

400-Traps Terrain Traps

Polypropylene traps

- 32 and 40mm polypropylene traps
- Range includes self resealing bottle traps
- All traps have universal compression outlets which, in addition to all Terrain waste pipes, will accept other MuPVC waste pipe

500-Overflow Terrain Overflow System

Solvent-welded PVCu system for cold, non-pressure water

- 19mm PVCu pipe and fittings
- Range of tank connectors

600-Solvent Terrain Waste System

Solvent-welded ABS system

- 32, 40 and 50mm integrated systems
- Wide range of bends and adaptors

Terrain

Soil Systems - 100 Solvent

Size mm	Angle	Col	Pack/Box	Code	Price Each	
Soil pipe						
Plain ended.						
82 (3m)		GW	2/88	100.3.30	£73.43	
82 (4m)		GW	2/88	100.3.40	£96.15

Polypipe Advantage

Looking for a service to help deliver time, resource and cost savings on your next project?

Introducing Polypipe Advantage, from Polypipe Building Services. A design, fabrication, delivery, technical and customer support service that gives you the Advantage.

What is it?

A service that delivers designed and fabricated building service solutions with dedicated project management from design through to delivery, installation and onsite support. We make it. Simple.

How we provide Advantage?

By working together to deliver just-in-time fabricated solutions and supporting contractors from design through to delivery and install we provide contractors the Advantage by;

- Reducing planning time through dedicated design, project & logistics management
- Reducing on-site labour costs
- Reducing on-site labour time
- Reducing on-site waste
- Reducing on-site storage

Why recommend Polypipe Advantage?

With shifts in the construction labour market, an increasing focus on environmental issues and pressure to deliver construction projects on time, contractors will be looking to the supply chain to help alleviate challenges onsite, so there's never been a better time to offer these services.

Whichever building services system you require to help overcome your unique project challenges, we make it. Simple. Polypipe Advantage. More than fabrication.

POLYPIPE
ADVANTAGE

MORE THAN FABRICATION

We make it. Simple.

Advantage from Polypipe Building Services. Providing the solutions you need, to help make the complex simple.

Designing and fabricating systems based on your unique project requirements, Advantage is with you at every stage – from initial planning and project management, through to final delivery – helping you overcome any twists or turns along the way.

Advantage. More than fabrication.

Discover simplicity, visit: polypipe.com/polypipeadvantage

Terrain FUZE

Introduction

A modern high density polyethylene system with many advantages over cast iron and other traditional systems. Terrain FUZE is a top-to-bottom solution for all above ground drainage and many chemical waste applications. It allows specifiers and installers to benefit by providing them maximum flexibility in the design process.

Utilising the intrinsic properties of high-density polyethylene, Terrain FUZE offers greater benefits above and beyond more traditional materials and performs significantly better when tested for impact and abrasion resistance, chemical corrosion and extreme temperatures. The lightweight nature of Terrain FUZE allows the product to be installed quickly and efficiently, giving direct, resource-saving benefits to specifiers and installers.

HDPE offers exceptional performance above and beyond traditional pipe materials including:

- Suitable for use with Terrain Siphonic Roof Drainage (see page 45 for further details)
- Versatile application
- Highly resistant to impact even at low temperatures
- Highly resistant to chemical agents
- Corrosion resistant
- Abrasion resistant
- Lightweight and easy to install
- Ideal for Terrain fabrication service

Innovative Products

Terrain FUZE HDPE Manifolds

A product designed with the customer in mind, for many different scenarios. Featuring 12 perfectly situated bosses, this allows for multiple different entry points; all of which can be used simultaneously due to the engineered central baffle removing cross flow. See page 28 for further details. Also perfect for our Advantage service, see page 22 for further details.

Terrain Anchor / Guide Bracket

This dual use guide or anchor bracket has a simple clip, which once removed, allows adjustability for the product to go from guide to anchor. This multi-functional product is engineered to ease installation and lessen time taken. See page 34 for further details.

Terrain P.A.P.A. and Pleura Vent Systems

The Terrain P.A.P.A. and Pleura Vent Systems allow for an engineered approach in the removal of secondary venting and reduction of roof top penetrations. See page 39 for further details.

NEW MECHANICAL COUPLING

COST EFFECTIVE

The Mechanical Coupling is a lightweight and cost effective jointing method for Gravity Drainage Pipe Application.

DESIGN

Engineered to meet high demands of sectors where reliable, durable and aesthetically pleasing pipecouplings are required.

LIFE CAPABILITIES

Extensive life capabilities from the stainless steel case and EPDM gasket material.

DIN 86128 FORM F

Coupling dimensions approved to DIN 86128 Form F standard.

PERFORMANCE

Performance is approved to ASTM F1476 Type 11 Class 3 flexible and unrestricted standard.

Electrofusion Coupling

Available in sizes 40 - 315mm

Connection properties:

Non-removable

Tension resistant

Use

This form of jointing is suitable for on-site welding, additional installations, repair work and modifications.

The pressure required for welding is obtained from the shrinking effect of the sleeve upon

heating and is distributed equally over the entire weld.

This shrinkage has a compensating effect on pipe diameter measurement tolerances.

By removing the central stop ring, the electrical sleeves can be made to slide to enable system modifications and repairs.

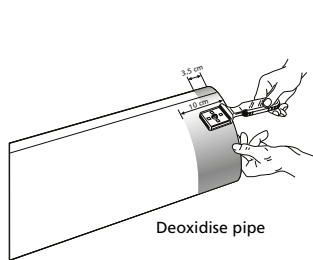

The electrical resistance wires will not corrode as they are protected by HDPE after welding.

Pipe scraper

Terrain FUZE Box

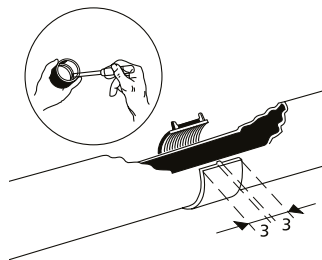

Deoxidise pipe

Cut the pipe squarely, dry, clean and scrape the welding surfaces. The surface must remain clean and dry during the whole welding process, therefore do not touch with your hands.

The length of pipe to be scraped with diameters ranging from 40 - 160mm is 35mm.

The length of pipe to be scraped with diameters 200, 250 and 300mm is 100mm.

Insert pipe or fitting into sleeve coupling. If the stop ring in the sleeve needs to be removed, mark the depth at 30mm.

Expansion Socket with Ring Seal

Available in sizes 40 - 315mm

Connection properties:

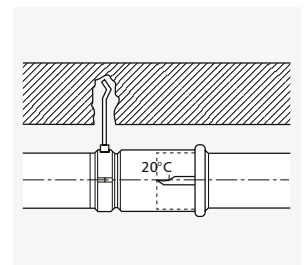

Non-removable

Non-tension resistant

Use

Expansion sockets can be used in underground pipe systems as normal push-fit fittings but must be provided on vertical stacks running from floor to floor and for rainwater pipes both inside and outside the building.

Horizontal assembly (e.g. at an ambient temperature of 20°C).

Terrain P.A.P.A.® and Pleura Vent System

- Replaces extensive ventilation pipework, saving costs in material and installation.
- Allows more flexibility in the layout and design of internal drainage systems for engineers, architects and design professionals.
- Offers a point-of-need solution that quickly responds to transient air fluctuations.

Terrain Pleura 50

The Terrain Pleura 50 air regulator provides ventilation to branch pipework. It is generally installed on the pipe behind the appliance trap.

The Terrain Pleura 50 opens and admits fresh air into the branch pipe when the negative (suction) pressure occurs from an appliance discharging into the pipework system. This equalises the ambient air pressure within the pipework and protects the trap seal.

When the flow stops and the internal ambient air pressure in the pipework balances, the Terrain Pleura 50 closes by gravity and prevents foul air entering the built environment.

Terrain Pleura 100

The Terrain Pleura 100 air regulator can be fitted on to the top of a foul or waste stack, or at the end of long low gradient branch drains, to provide ventilation.

The Terrain Pleura 100 opens and admits fresh air under condition of reduced pressure in the discharge pipes and prevents trapped water seals being drawn. As the internal ambient air pressure in the pipework balances, the Terrain Pleura 100 closes by gravity and prevents foul air entering the built environment.

Terrain P.A.P.A.

The Terrain P.A.P.A. is a positive air pressure attenuator, designed to mitigate the affects of positive air fluctuations in the drainage pipework system. As water descends down the drainage stack it creates a negative pressure; if that flow is interrupted or is approaching a change of direction, the negative pressure changes to a positive pressure and moves up the pipe. This low amplitude air wave travels typically at 320m/s, the speed of sound. As the positive air fluctuation approaches the branch-off point for the Terrain P.A.P.A., the bladder within the unit reacts very quickly, within 0.2 seconds, and starts to expand; this creates a pressure differential at the branch-off point. The branch to the Terrain P.A.P.A. then becomes the path of least resistance and the majority of the positive air pressure is absorbed within the unit.

As the ambient air pressure within the pipework starts to equalise, the bladder slowly releases the small volume of air into the pipework system at only 12m/s which will have no effect on the trap seals.

Terrain dB12

Acoustic drainage system with superior performance

We all know how much noise water can make when it travels through a building and how intrusive this sound can be. In endeavouring to meet sound controls within Building Regulations, additional materials and labour are required, increasing the cost and time on site. Terrain dB12 is a complete acoustic drainage system designed to reduce the effect of noise.

Terrain dB12 multilayer drainage pipe with acoustic fittings creates a high quality durable and reliable system developed specifically to meet construction requirements for increased level of soundproofing, and ideally suitable for:

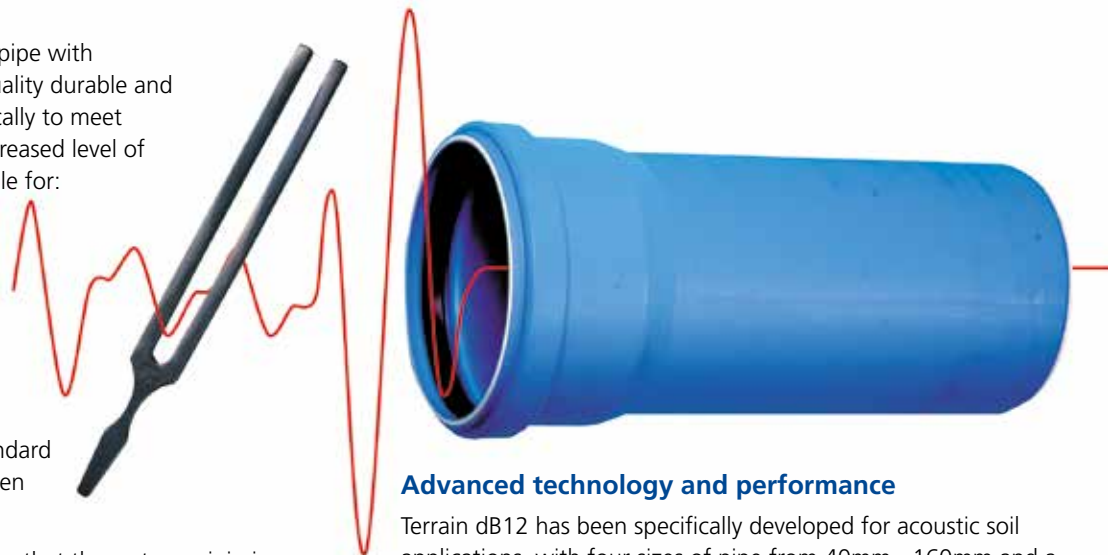

- Mixed development
- Hospitals
- Hotels
- Schools
- Commercial applications

Terrain dB12 combines the familiarity and advantages of standard ring seal soil systems, with a proven enhanced acoustic performance.

Vibration damping brackets ensure that the system minimises solid borne noise transmission.

The Benefits

- Proven noise reducing characteristics, tested to EN 14366/DIN 4109
- Flame retardant to B1 in compliance with DIN 4102
- Elevated impact resistance even at low temperatures
- Resistance to a wide range of chemical agents at high temperatures
- Push fit single lip Elastomeric seals
- Easy to install
- Complete with range of acoustically engineered fittings
- Fabrication is available for non standard products

Advanced technology and performance

Terrain dB12 has been specifically developed for acoustic soil applications, with four sizes of pipe from 40mm - 160mm and a comprehensive range of fittings to provide a complete solution for acoustic management of soil pipes.

Terrain dB12 multilayer pipe and acoustic fittings have been tested to the most recent European accreditations for airborne and impact noise, at the highly respected Fraunhofer Institute in Stuttgart.

Terrain dB12 now available in 200 and 250mm

MINIMAL DISRUPTION

MAXIMUM PROTECTION.

THE TERRAIN LIVE STACK REPLACEMENT
SERVICE WITH **FIRETRAP SLEEVES AND COLLARS**

Partnering with you, Polypipe delivers unique fabricated replacement drainage stack solution, featuring Terrain drainage systems; ready to install, ready when you are – and without having to move residents from their homes.

For complete peace of mind, they're also available with our Terrain Firetrap sleeves and collars, designed to go beyond today's fire regulations.

It's what you'd expect from a trusted product range and a company of innovators.

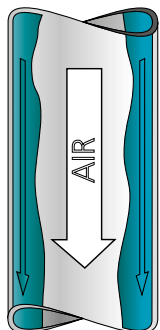

Terrain Siphonic Roof Drainage System

Terrain provides an advanced Siphonic Roof Drainage solution offering full compliance with BS 8490:2007 using Terrain FUZE BBA certified pipes and fittings. The Terrain Siphonic Roof Drainage system's self-cleaning, high velocity flow offers a quick and efficient way to remove large volumes of rainwater from roofs in a controlled manner. Designed to accommodate recent changes in storm patterns, as stipulated in BS EN 12056-3:2000 it uses siphonic principles to 'suck' the rainwater from the roof into small diameter pipes, creating a flow capacity up to ten times greater than that of an equivalent gravity-fed system.

Specially designed high flow siphonic roof drain eliminates air ingress to promote speedy priming

- Pipes run horizontally within building envelope
- Reduces underground drainage requirements
- Up to 45% cost saving overall
- Exceptionally accurate design software
- Easy routing of rainwater from roof to desired discharge location, making system an ideal partner for rainwater harvesting

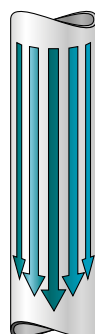

Gravity flow

A gravity drainage system limits capacity to one-third water, that adheres to the inner pipe wall, with a large two-thirds air core.

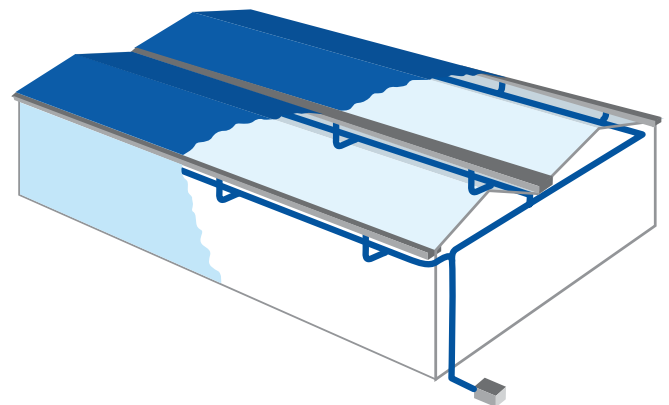

Terrain Siphonic Roof Drainage

With the Terrain Siphonic Roof Drainage System, air is purged from the pipe so that it runs 100% full of water, enabling smaller diameter pipes to remove higher volumes of rainwater.

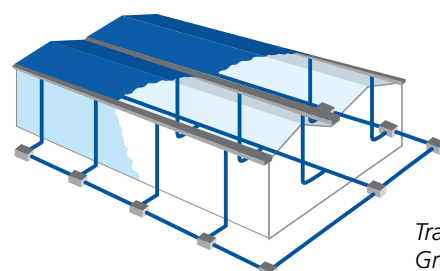

Design Freedom

With the Terrain Siphonic Roof Drainage System, collector pipes can be installed horizontally without a slope, allowing the design team to control downpipe locations.

This enables a significant reduction in underground drainage, trenching, soil removal, treatment of backfill and often means no drainage is required under the building floor slab.

Traditional Gravity Fed System

Terrain Underground Drainage

Introduction

Using the latest plastics manufacturing technology to satisfy the requirements of today's installers, the Terrain underground range offers both rigid and foam core pipe and a comprehensive range of fittings to suit all applications.

Terrain underground products represent the benchmark for quality, supported with outstanding service levels.

Our comprehensive range of underground drainage products are suitable for commercial, industrial, housing and public sector developments.

They are:

- Easy-to-lay
- Flexible, to accommodate normal ground movement
- Adaptable, to connect to existing drainage systems
- Unique products offer unrivalled installation options
- Suitable for commercial and domestic installations

Systems include:

Solid wall pipes and fittings

Available in 82, 110 and 160mm diameters. 110 and 160mm comply with BS EN 1401 (BS 4660).

Foamcore pipe

Manufactured using the latest tri-extrusion techniques to produce a three layer pipe that is 25% lighter than standard PVCu pipe. Available in 110 and 160mm diameters.

Equal sockets plus spigot outlet							
	To join 110mm or 160mm branch pipe to 110mm or 160mm main pipe at an angle: (110mm) 87½° and 45° as standard (160mm) 45° as standard						
	110	87½	T	5/15	4D30	£57.48	
Single unequal junction - all socket							
	To join 110mm branch pipe to 160mm main pipe at an angle: 45° and 87½° as standard.						
	160/110	45	♥	T	5	64D33D	£161.38

Gullies & Hoppers

	Size mm	Angle	Col	Pack/Box	Code	Price Each
Gully trap						
	Material: Polypropylene To obtain 'P' trap, add 45° bend.					
	110		T	4/12	4DG90	£54.15
'P' trap						
	Material: PVCu To obtain 'Q' or 'S' trap, add 45° or 87½° bend.					
	110		T	4/8	4DG91	£98.10
Square hopper head						
	Material: PVCu and Polypropylene Spigot outlet may be cut off to reveal socket which can accept solvent-welded pipe as extended spigot. Terracotta body with Black grid. 1 boss horn.					
	110		T	5/15	4DG92	£47.23
Rectangular hopper head						
	Material: PVCu and Polypropylene Back inlet plate incorporates two easily removable discs to create apertures for insertion of 40mm waste pipes. Terracotta body with Black grid. 3 boss horns.					
	110		T	4/12	4DG93	£85.80
Circular gully						
	Material: PVCu Incorporates plugged horizontal pipe entries: 2x110mm spigots, 1x110mm ring seal socket and 1x68mm rainwater pipe socket. Spigot outlet may be cut off to reveal socket which can accept solvent-welded pipe as extended spigot.					
	110		T	2/4	4DG80	£137.10
Bottle gully with round cover						
	Material: PVCu and Polypropylene. Removable dip tube provides 50mm deep trap. Incorporates 110mm back inlet connection. Terracotta body with Black cover.					
	110		T	4	4DG97	£153.47
Bottle gully with square cover						
	Material: PVCu and Polypropylene Removable dip tube provides 50mm deep trap Incorporates 2 x waste back inlet connections. Can also accept up to 6 different pipes either direct or via adaptors. Terracotta body with Black cover.					
	110		T	4	4DG89	£178.90

Underground Drainage

Gullies & Hoppers

	Size mm	Angle	Col	Pack/Box	Code	Price Each
Sealed cover						
	To cap 4DG80 Circular Gully or 4DG81 Extension Piece With screws and seal.					
	211		B	1/30	4DG82	£71.89
Circular grating						
	To provide an open grating for surface water drainage for 4DG80 Circular Gully or 4DG81 Extension Piece. Also: spare grating for 4DG97 Bottle Gully.					
	211		B	1/30	4DG83	£33.03
Raising piece						
	To extend upper aperture of 4DG97 Bottle Gully to surface level or to lower horizontal pipe entries beneath surface level.					
	200		T	3	4DG96	£93.48
Square hopper head grid						
	Material: Polypropylene. Spare grid for 4DG92 Hopper Head.					
	155		B	1/100	4DG92G	£10.00
	Material: Polypropylene. Spare grid for 4DG89 Hopper Head.					
	232		B	1/15	4DG89G	£14.92
Square sealed cover						
	Material: Polypropylene. Converts 4DG92 Square Hopper. Head from open grid to sealed cover. With screws and seal.					
	155		B	1/100	4DG92GS	£44.26

Inspection Chambers

	Size mm	Angle	Col	Pack/Box	Code	Price Each
Shallow inspection chamber						
	To allow inspection of drainage system. Supplied with 2 plugs for unused entries. 200mm socket has angular tolerance of $\pm 7^\circ$ allowing up to 14° adjustment to accommodate pipe variation and ground fall. Access aperture size: 162x100mm. Requires seal 9116.4 found on page 19.					
	110		T	2	4DI600	£164.97
Sealed cover and frame						
	To cap 4DI600 Shallow Inspection Chamber. Ring seal joint to shaft					
	110		B	4/12	4DIFC1	£129.01
Inspection chamber base - 470mm diameter						
	Material: Polypropylene. To allow inspection of drainage system. Incorporating 110mm main channel and 4 x 110mm branch inlets. Supplied with 4 x blanking plugs					
	110		B	1	4DI240B	£266.98
Unequal inspection chamber base - 475 diameter						
	Material: Polypropylene supplied with 4 x blanking plugs. To allow inspection of drainage system, incorporating 160mm main channel, 2 x 160mm and 2 x 110mm branch inlets.					
	160/110		B	1	64DI240B	£294.07
Raising piece						
	Material: Polypropylene. To extend height of Inspection Chamber Base (4DI240B & 64DI240B) to surface level. Requires seal (4DI2155).					
	470		B	1	4DI215R	£108.38
Seal ring						
	Material: Polypropylene. To allow inspection of drainage system, incorporating 160mm main channel, 2 x 160mm and 2 x 110mm branch inlets.					
			B	1	4DI215S	£25.66
Cover and frame						
	Material: Polypropylene cover and frame. BS EN 124: 1994 – Group 1, Class A15 (formerly BS497: 1976 Class C+). For domestic drive-ways accessible to vehicles up to one tonne maximum wheel load.					
	579		B	1	4DIFC4	£315.11

Flexicon Couplings

Flexicon couplings are available as straight connections or adaptors for a wide range of pipe materials and sizes.

These robust EDPM flexible rubber couplings have been manufactured to BS EN 681-1 and are ideal for jointing pipes for sewerage, drainage and other low pressure applications.

Flexicon couplings can be manufactured from other types of rubber to suit customer requirements.

SIMPLE 'CLICK' CON-
NECTION

SIMPLE
ELECTROFUSION WELD

B-s1, d0*
FIRE CLASSIFICATION

MecFlow

CLICK. WELD. DONE.

Introducing a new water supply system. One that's quick to install with a unique and simple click and electrofusion welding system. One that's material formulation achieves a fire classification of B-s1, d0* and is suitable for multiple water supply applications. Designed and manufactured off-site through our Polypipe Advantage service, MecFlow is delivered in a kit, ready to install for a smart, quick installation.

MecFlow – The future of water supply

*Fire classification rating according to EN13501, installed according to building regulations.
We recommend MecFlow be installed with our Firetrap sleeves.

For more information, visit polypipe.com/mecflow
